PROGRAM STUDI INFORMATIKA
UNIVERSITAS MULAWARMAN
SAMARINDA
2026

1. Flowchart

2. Deskripsi Singkat Program

Tujuan program ini dibuat adalah untuk membantu proses pembayaran pengguna langganan aplikasi streaming musik ANGKASA. Di dalam aplikasi ini pengguna dapat memilih salah satu dari berbagai jenis paket langganan streaming, dan juga proses pembayaran menjadi lebih efisien karena harga dan hasil pembayaran diproses langsung oleh program berdasarkan pilihan pengguna.

3. Source Code

A. Fitur Login Pengguna

Fitur ini digunakan untuk mengecek nama dan 2 digit terakhir NIM sebelum pengguna dapat masuk ke menu pembayaran.

Source Code:

```
nama = "Jeny Najla Ariyani"
nim = "46"

print("\nPlease fill in your name and NIM first (｡◕ˇ◕｡)")
nama = input("Your Name: ")
nim = input("NIM: ")

if nama == "Jeny Najla Ariyani" and nim == "46":
    print("\nLogin successful. Welcome,", nama, "o(〰^〰)o !")
else:
    print("\nLogin failed. Please check your name and NIM.")
```

B. Fitur Menampilkan Paket Langganan

Fitur ini menampilkan empat pilihan paket langganan yang tersedia. Pengguna dapat memilih paket dengan memasukkan angka 1 sampai 4.

Source Code:

```
print("\nLogin successful. Welcome,", nama, "o(〰^〰)o !")
print("\nLet's Take A Look to Our PLa(n)et (｡◕ˇ◕｡) ~")
print("1. Orbit Plan(et) - Fee 1% + Free access to All Popular Songs")
```

```

    print("2. Nebula Plan(et) - Fee 3%" + "+ Free access to All Premium Songs  
and Playlist Customs")
    print("3. Galaxy Plan(et) - Fee 5%" + "+ Free access to All Premium Songs,  
Playlist Customs, and Offline Mode")
    print("4. Su-su-supernova Plan(et) - Fee 7%" + "+ Free access to All  
Featured Songs, Playlist Customs, Offline Mode, and Exclusive Artist Content ")

    pilihan = input("\nWe would to like know which one is ur fayyvorite plan(et)  
[1/2/3/4]: ")

```

C. Fitur Validasi Paket Langganan

Paket Orbit memiliki biaya administrasi 1% dan memberikan akses dasar ke lagu-lagu populer. Paket Nebula memiliki biaya administrasi 3%, dengan akses lagu premium dan playlist kustom. Paket Galaxy memiliki biaya administrasi 5%, dengan lagu premium, playlist kustom, dan mode offline. Paket Supernova memiliki biaya administrasi 7% dan menyediakan seluruh fitur termasuk konten eksklusif artis.

Source Code:

```

biaya_langganan = 1500000
if pilihan == "1":
    paket = ("Orbit Plan(et)")
    biaya_admin = 0.01
    fitur = ("Free access to All Popular Songs")
elif pilihan == "2":
    paket = ("Nebula Plan(et)")
    biaya_admin = 0.03
    fitur = ("Free access to All Premium Songs and Playlist Customs")
elif pilihan == "3":
    paket = ("Galaxy Plan(et)")
    biaya_admin = 0.05
    fitur = ("Free access to All Premium Songs, Playlist Customs, and  
Offline Mode")
elif pilihan == "4":
    paket = ("Su-su-supernova Plan(et)")
    biaya_admin = 0.07
    fitur = ("Free access to All Featured Songs, Playlist Customs, Offline  
Mode, and Exclusive Artist Content")

```

```
else:  
    print("\nInvalid choice. Please select a valid plan(et).")
```

D. Fitur Menghitung Biaya Administrasi

Program menghitung biaya administrasi berdasarkan paket yang dipilih.

Source Code:

```
biaya_admin = int(biaya_langganan * persen_admin)
```

E. Fitur Menghitung Total Pembayaran

Setelah biaya administrasi didapatkan, program menghitung total yang harus dibayar.

Source Code:

```
total_bayar = biaya_langganan + biaya_admin
```

F. Fitur Menghitung Rupiah

Fitur ini membuat angka pembayaran lebih mudah dibaca dengan menggunakan tanda titik sebagai pemisah ribuan.

Source Code:

```
print(f"Subscription Fee: Rp {biaya_langganan:,}".replace(",", "."))  
print(f"Admin Fee: Rp {biaya_admin:,}".replace(",", "."))  
print(f"Total Payment: Rp {total_bayar:,}".replace(",", "."))
```

G. Fitur Menampilkan Detail Pembayaran

Setelah pengguna memilih paket, program menampilkan informasi pembayaran secara lengkap.

Source Code:

```
print("\n📄 Angkasa Payment Details:")

    print("\nYour Name:", nama)
    print("Selected Plan(et):", paket)
    print("Features Included:", fitur)
    print(f"Subscription Fee: Rp {biaya_langganan:,}".replace(",", "."))
    print(f"Admin Fee: Rp {biaya_admin:,}".replace(",", "."))
    print(f"Total Payment: Rp {total_bayar:,}".replace(",", "."))

    response = input("\nDo you want to proceed with the payment? (yes/no):")

    if response.lower() == "yes":
        print("\nPayment successful. Thank you for choosing Angkasa's Plan(et) (ノ◡◡)ノ*:~°❖")
    else:
        print("\nPayment cancelled. Please restart the program if you wish to make a new selection.")
```
